AD Mortgage (AD) is committed to the policy of originating sound mortgage loans of investment quality. Investment quality is determined by evaluating the three components of the underwriting analysis.

Credit: An acceptable credit reputation is established by a history that, when viewed as a whole, evidences a borrower's willingness to make timely payments on obligations.

Capacity: The borrower must have the ability to repay the mortgage in the amount and terms stated. Adequate capacity is established by documenting stable monthly income and/or assets along with other information such as how the borrower paid obligations in the past that, which evidences the borrower's ability to make periodic payments approximating the amount of the proposed monthly debt payment. Regardless of the level of the borrower's previous monthly payments, the file must contain evidence of the borrower's ability to meet all new obligations after the new mortgage is made. When the borrower's obligations increase significantly with the mortgage, the Transmittal Summary (1008) must contain an explanation as to how the borrower will meet the higher payment.

Collateral: The collateral must meet minimum property requirements as specified herein. Each property must also have an established value to support the loan transaction. This value will help in determining the risk associated with the loan transaction.

Each of the above components must be found to be acceptable. Investment quality is determined by the borrower's credit, capacity, and collateral. A weakness in any one of the three components must be supported by strengths in one or both of the remaining two components.

1. GENERAL REQUIREMENTS

6.8.2. SECONDARY VALUATION PRODUCT REQUIRED

An eligible secondary valuation product is required for all loan files, unless a second full appraisal is provided. If a loan has a second full appraisal, then lower of the 2 appraisal values will be used to

qualify (for purchase transactions – lesser of the purchase price and appraised values). **The secondary valuation cannot be more than 10% less than the appraised value, otherwise it is deemed ineligible.**

For files requiring a secondary valuation product, below options are available:

- Secondary valuation waterfall:
 1. FNMA SSR CU score ≤ 2.5
 2. If FNMA SSR CU score is > 2.5 or unavailable, then AVM with 90%+ confidence score is required.
 3. If AVM is ineligible or unavailable, CDA is required.
 4. If CDA is ineligible or unavailable, a second appraisal is required & must be ordered at borrower's expense.

6.9. APPRAISAL RECONSIDERATION OF VALUE

To mitigate the risk of inflated appraised value, a reconsideration of value will only be considered on a case-by-case basis with strong supporting documentation. The following steps must be taken to request a reconsideration of appraised value:

1. Requestor completes the Appraisal Reconsideration form in its entirety
 - The section regarding the facts must be completed.
 - Additional comparables the appraiser should consider must be provided.
 - The form will be submitted once – AD will not review multiple requests for the same property.
2. The completed form is submitted to the respective Underwriter.
3. The request will be reviewed by the Underwriter and may be escalated to the Underwriting Manager and a decision will be made if a reconsideration of value will be presented to the AMC/appraiser.
4. If a reconsideration of value is received from the appraiser, the Underwriter or Underwriting Manager must review the updated appraisal to determine if the new value may be used.

Exhibit 1 – Future Income Parameters

Acceptable Future Employment - **Requires non-contingent employment contract and verified through HR

For those borrowers that do not have any apparent education, training, or experience in the new field of work consider the following:

Large Corporations (500+ employees):	Government & Public Sector:
Amazon	Local/State/Federal Government Agencies
Bank of America	Public School Districts
Home Depot	Police Departments
Delta Airlines	Fire Departments
Microsoft	Public Universities
*List is not all inclusive	USPS

Group practices with 10+ doctors	Large accounting or law firms (e.g., Deloitte, PwC)
Residency placements or fellowships with established hospitals	Healthcare IT companies with 500+ employees

Unacceptable Future Employers

Small Businesses, Local Shops, Independent Contractors:
Local restaurants or food trucks
Family-owned retail stores
Independent gyms or salons
Small contracting firms without formal onboarding
Startups with under 50 employees
1099-based platforms (Uber, DoorDash, Fiverr)
Any employer lacking formal HR infrastructure
Unusually high income for the position or market (e.g., a \$130K salary for a junior-level role in a rural area). Public tools like BLS, Glassdoor, and Salary.com can help benchmark typical salary ranges.
Unusual formatting or content on paystubs/W-2s, including irregular deductions or mismatches with 4506-C transcripts.

Other Considerations

In addition to considering the size and type of employer, emphasis must also be placed on the borrower's work history. If they have a good two-year work history in the same or similar line of work, that can bear some weight when they are going to start a new position. Additional weight should be given to people who are in a specialized field of work and are staying in those fields. For example, Accountants and Environmental Engineers who have prior experience, training and education in these fields are less likely to take fake jobs but are likely to take new jobs at small firms. Extra consideration should be reviewed for lines of work that are known for frequent job changes. For example, traveling nurses, oil rig operators, and people in the film and television industries will often have numerous employers in the same line of

work over a two-year work history. Future Income that involves a move to another state or income significantly increases will be reviewed by a Team Lead.

****All Guidelines for Employment Contracts must be met.**
