The power of yes.

Unusually high income for the position or market (e.g., a \$130K salary for a junior-level role in a rural area). Public tools like BLS, Glassdoor, and Salary.com can help benchmark typical salary ranges.

Unusual formatting or content on paystubs/W-2s, including irregular deductions or mismatches with 4506-C transcripts.

Other Considerations

In addition to considering the size and type of employer, emphasis must also be placed on the borrower's work history. If they have a good two-year work history in the same or similar line of work, that can bear some weight when they are going to start a new position. Additional weight should be given to people who are in a specialized field of work and are staying in those fields. For example, Accountants and Environmental Engineers who have prior experience, training and education in these fields are less likely to take fake jobs but are likely to take new jobs at small firms. Extra consideration should be reviewed for lines of work that are known for frequent job changes. For example, traveling nurses, oil rig operators, and people in the film and television industries will often have numerous employers in the same line of work over a two-year work history. Future Income that involves a move to another state or income significantly increases will be reviewed by a Team Lead.

****All Guidelines for Employment Contracts must be met.**
